

WHAT IS BLOOD?

Blood is mostly water and cells. It travels around and around your body in tubes large and small. It delivers nutrients and oxygen to all of your cells. It picks up cell wastes and carries them to your lungs and kidneys.

WHITE BLOOD CELL

RED BLOOD CELLS

PLATELETS

Gotcha! This white blood cell captures germs and destroys them.

Red blood cells carry oxygen. White blood cells fight germs. Tiny platelets help stop bleeding when you get a cut.

RED BLOOD CELLS
